NOTE: Melvin Belli, former attorney for Jack Ruby, and Mark Lane, the New York attorney who has made a number of false allegations and charges regarding the Commission's inquiries into the assassination, had a debate in San Francisco on 10-9-64. Belli took the position that the Warren Report was an excellent document, whereas Lane attacked several of the findings in the report involving evidential matters. The Commission has previously requested the results of our coverage of Mark Lane and, as a result, this data should be forwarded to the Bureau by San Francisco in a LHM setting forth complete details regarding the debate.
